Architecture of Minoan Crete John C. McEnroe, 2010-05-01 A comprehensive, scholarly, engaging look at the meanings behind key architectural designs of ancient Minoan culture. Ever since Sir Arthur Evans first excavated at the site of the Palace at Knossos in the early twentieth century, scholars and visitors have been drawn to the architecture of Bronze Age Crete. Much of the attraction comes from the geographical and historical uniqueness of the island. Equidistant from Europe, the Middle East, and Africa, Minoan Crete is on the shifting conceptual border between East and West, and chronologically suspended between history and prehistory. In this culturally dynamic context, architecture provided more than physical shelter; it embodied meaning. Architecture was a medium through which Minoans constructed their notions of social, ethnic, and historical identity: the buildings tell us about how the Minoans saw themselves, and how they wanted to be seen by others. *Architecture of Minoan Crete* is the first comprehensive study of the entire range of Minoan architecture—including houses, palaces, tombs, and cities—from 7000 BC to 1100 BC. John C. McEnroe synthesizes the vast literature on Minoan Crete, with particular emphasis on the important discoveries of the past twenty years, to provide an up-to-date account of Minoan architecture. His accessible writing style, skillful architectural drawings of houses and palaces, site maps, and color photographs make this book inviting for general readers and visitors to Crete, as well as scholars.

Minoan Architecture and Urbanism Quentin Letesson, Carl Knappett, 2017-06-30 Minoan Crete is rightly famous for its idiosyncratic architecture, as well as its palaces and towns such as Knossos, Malia, Gournia, and Palaikastro. Indeed, these are often described as the first urban settlements of Bronze Age Europe. However, we still know relatively little about the dynamics of these early urban centres. How did they work? What role did the palaces have in their towns, and the towns in their landscapes? It might seem that with such richly documented architectural remains these questions would have been answered long ago. Yet, analysis has mostly found itself confined to building materials and techniques, basic formal descriptions, and functional evaluations. Critical evaluation of these data as constituting a dynamic built environment has thus been slow in coming. This volume aims to provide a first step in this direction. It brings together international scholars whose research focuses on Minoan architecture and urbanism as well as on theory and methods in spatial analyses. By

combining methodological contributions with detailed case studies across the different scales of buildings, settlements and regions, the volume proposes a new analytical and interpretive framework for addressing the complex dynamics of the Minoan built environment.

Minoan Realities Diamantis Panagiotopoulos,2012 What is the social role of images and architecture in a pre-modern society? How were they used to create adequate environments for specific profane and ritual activities? In which ways did they interact with each other? These and other crucial issues on the social significance of imagery and built structures in Neopalatial Crete were the subject of a workshop which took place on November 16th, 2009 at the University of Heidelberg. The papers presented in the workshop are collected in the present volume. They provide different approaches to this complex topic and are aimed at a better understanding of the formation, role, and perception of images and architecture in a very dynamic social landscape. The Cretan Neopalatial period saw a rapid increase in the number of palaces and 'villas', characterized by elaborate designs and idiosyncratic architectural patterns which were themselves in turn generated by a pressing desire for a distinctive social and performative environment.

Power and Architecture Joachim Bretschneider,Jan Driessen,Karel van Lerberghe,2007 The idea that societies and rulers express their power through monumental architecture is not a new one, but this collection of essays, the result of a 2002 conference in Leuven, takes the argument back to the very beginnings of monumental architecture in the Bronze Age Near East and Aegean, to ask if this process can be linked to a particular ...

Introduction to Aegean Art Philip P. Betancourt,2007-12-31 This textbook is a compilation of the author's more than 35 years of teaching and excavation experience in the field of Aegean Bronze Age art history and archaeology. It is geared toward an audience of undergraduate and graduate students as an introduction to the Bronze Age art objects and architecture that have been uncovered on Crete, the Greek peninsula, and the Cycladic Islands.

Minoans Rodney Castleden,2002-01-04 Thoroughly researched, Rodney Castleden's Minoans: Life in Bronze Age Crete here uses the results of recent research to produce a comprehensive new vision of the peoples of Minoan Crete. Since Sir Arthur Evans rediscovered the Minoans in the early 1900s, we have defined a series of cultural traits that make the 'Minoan personality': elegant, graceful and sophisticated, these nature lovers lived in harmony with their neighbours, while their fleets ruled the seas around Crete. This, at least, is the popular view of the Minoans. But how far does the later work of archaeologists in Crete support this view? Drawing on his experience of being actively involved in research on landscapes processes and prehistory for the last twenty years, Castleden writes clearly and accessibly to provide a text essential to the study of this fascinating subject.

Minoan Architecture Joseph W. Shaw,2009

Cultural Identity in Minoan Crete Ellen Adams,2017-09-07 Neopalatial Crete - the 'Golden Age' of the Minoan Civilization - possessed palaces, exquisite artefacts, and iconography with pre-eminent females. While lacking in fortifications, ritual symbolism cloaked the island, an elaborate bureaucracy logged transactions, and massive storage areas enabled the redistribution of goods. We cannot read the Linear A script, but the libation formulae suggest an island-wide koine. Within this cultural identity, there is considerable variation in how the Minoan elites organized themselves and others on an intra-site and regional basis. This book explores and celebrates this rich, diverse and dynamic culture through analyses of important sites, as well as Minoan administration, writing, economy and ritual. Key themes include the role of Knossos in wider Minoan culture and politics, the variable modes of centralization and power relations detectable across the island, and the role of ritual and cult in defining and articulating elite control.

Elite Minoan Architecture Joseph W. Shaw,2015-12-31 The goal of this book is to trace the development of elite Minoan architectural forms that arose during the late Protopalatial (Middle Minoan II) and early Neopalatial periods (Middle Minoan III). The study of this architectural development concentrates on the older, larger sites of Knossos, Malia, and Phaistos where those very forms seem to have originated. Other Minoan towns and palaces in Crete are referenced when appropriate.

Maritime Networks in the Mycenaean World Thomas F. Tartaron,2013-05-27 In this book, Thomas F. Tartaron presents a new and original reassessment of the maritime world of the Mycenaean Greeks of the Late Bronze Age. By all accounts a seafaring people, they enjoyed maritime connections with peoples as distant as Egypt and Sicily. These long-distance relations have been celebrated and much studied; by contrast, the vibrant worlds of local maritime interaction and exploitation of the sea have been virtually ignored. Dr Tartaron argues that local maritime networks, in the form of 'coastscapes' and 'small worlds', are far more representative of the true fabric of Mycenaean life. He offers a complete template of conceptual and methodological tools for recovering small worlds and the communities that inhabited them. Combining archaeological, geoarchaeological and anthropological approaches with ancient texts and network theory, he demonstrates the application of this scheme in several case studies. This book presents new perspectives and challenges for all archaeologists with interests in maritime connectivity.

Neoteros Brent Eric Davis,Robert Laffineur,2020-03-13 Beginning his academic career in Classical Studies, John G.

Younger rapidly extended his expertise into prehistoric (Bronze Age) Aegean archaeology, art and architecture, with a particular focus on ancient stone-working... and from this interest came his seminal studies on the iconography of Bronze Age Aegean stone seals, a field on which he has made an indelible mark. He also branched out into Jewish Studies, becoming an expert on early synagogues. His lifelong activism for LGBTQI+ and minority rights, and his early embrace of feminism and the crucial role that women have played in the past (not just in archaeology, but in the ancient world itself) have also informed his teaching and studies regarding ancient and modern notions about gender and sexuality, and these studies have greatly enriched our views of the ancient world, while going a long way toward counteracting the persistently male-centric interpretations of the ancient world characteristic of the past few centuries. He has been a pioneer in the establishment of LGBTQI+ academic programs in the U.S., and in the integration of modern technologies (especially computers) into Classics and archaeology. He has established himself as an international authority on Linear A, the undeciphered writing system of the Minoans; his website containing the corpus of that script is second to none in terms of its value to scholars working on Linear A. His recent and continuing investigations into the identification of prehistoric Aegean myths promises to add yet another facet to what is already a brilliant diamond of a career.

Brill's Companion to Warfare in the Bronze Age Aegean, 2023-12-11 Aegean prehistory was born out of the search for the Trojan War. Since the time of Heinrich Schliemann, new forms of evidence have come to light and innovative questions have arisen, including examinations of warfare as a concept. This volume interrogates the nature of warfare in the Bronze Age Aegean for scholars and teachers with knowledge of the ancient Mediterranean, who wish to access the state of the field when it comes to the ways that specialists approach warfare in the prehistoric Aegean. Authors review evidence, consider the social and cultural place of war, and revisit longstanding questions.

Our Cups Are Full: Pottery and Society in the Aegean Bronze Age. Papers Presented to Jeremy B. Rutter on the Occasion of his 65th Birthday Walter Gauß, Michael Lindblom, R. Angus K. Smith, 2011-06-15 38 papers on Aegean Bronze Age pottery in honour of Jeremy Rutter. They range from specific site reports, to technical reports, and issues of chronology, to analysis of the social and religious functions of particular vessel types, and studies of trade and cultural contacts.

Processions: Studies of Bronze Age Ritual and Ceremony presented to Robert B. Koehl Judith Weingarten, Colin F. Macdonald, Joan Aruz, Lara Fabian, Nisha Kumar, 2023-10-05 Robert Koehl has long considered processions to have played an integral role in Aegean Bronze Age societies. Papers concentrate mainly on evidence from Crete, the Cyclades and the Greek

mainland, with additional perspectives from abroad, these geographic divisions forming the basic outline of this volume.
